

Sigue los pasos del Manual Interactivo para lanzar la instancia en AWS. Mientras lo haces, crea un documento llamado  **memoria\_despliegue.pdf** con las siguientes capturas:

```
PS I:\SGE-25\SGE-UD4-Practicas\UD4.PRO.ec2-desde-AMI> aws sts get-caller-identity

- **Captura 1:** El comando de lanzamiento en la terminal justo antes de pulsar Enter (debe verse el uso de --user-data [file://odoo-boot.sh](#)).
